Dermacolor Camouflage System is the Paramedical Line developed by Kryolan. This system is designed to conceal disfigurements or discolorations whether they are of accidental, dermatological, surgical or congenital origin. *Dermacolor Camouflage System* is especially effective in minimizing post-surgical conditions either aesthetic or medical surgery. Its effectiveness and quality are proven in intensive and long-term use under clinically supervision.

The intermixable skin tones allow for a natural appearance when applied as directed. With proper use of the *Dermacolor Camouflage System* skin abnormalities in both colour and texture can be easily corrected, resulting in both **weatherproof** and **long-lasting** effects. With the most advanced camouflage system the stress and psychological factors arising from such skin problems are lessened and the user will feel greater confidence. The program is effective for men, women and children. Toxic or allergic reactions have never been observed with the *Dermacolor Camouflage System*.

Use of the *Dermacolor Camouflage System* should be supervised by a paramedical consultant for *Dermacolor*. However, if this is not possible, one can begin the program by carefully following the instructions enclosed in each package of *Dermacolor Camouflage Creme* or by reading the last page of this info pack.

Extract from Product Test Approval

A total of 100 patients were subjected to epicutaneous testing of the skin of their backs for 48 and 72 hours. These tests were performed by applying *Dermacolor D4* to an adhesive test bandage and then applying the bandage to the skin for the above stated periods of time. All the patients were tested on an inpatient basis and were observed during the entire procedure of the test. No skin intolerance reaction to *Dermacolor D4* was observed.

In a second series of tests, *Dermacolor D4* was applied to the skin of the face, neck and ear regions. These tests were administered to patients who were known to exhibit sensitivity in these skin regions. This *Dermacolor D4* testing was performed on 22 patients **with skin sensitivity**, on areas of skin which had already exhibited changes. No irritation of the skin was observed with these patients. The conclusion can therefore be reached that *Dermacolor D4* is satisfactorily tolerated by the skin and that sensitivity reactions were not observed during this testing.

It deserves to be recorded here that no positive test results were observed with *Dermacolor D4*, even with test persons who were known to have extreme sensitivity to various medications and preservatives.

It must also be noted that a second series of tests was performed with *Dermacolor D4*, with repeated application to the skin four weeks after primary exposure. Even after the secondary exposure, no skin reaction could be determined. This test was performed on a group of 32 patients.

Indications

For psychological and aesthetic reasons, *Dermacolor* is recommended as a camouflage for skin problems especially Naevus flammeus multilateralis, other simpler skin blemishes, Vitiligo, Haemangioma, Rosacea, Chloasma, Tele-angiectasien, Epheliden, scars and tattoos.

Dermacolor Tester Kit

This is a box containing small quantities of different products in the *Dermacolor* range. This is a great way of experimenting with this camouflage system. Included are: *Camouflage Cream* (7 shades), *Fixing Powder* (in P3), *Cleansing Milk*, *Cleansing Lotion*, *Moisturizer* and *Cleansing Cream*. We recommend ordering this tester kit along with a *Mini Palette*, if you have not used the *Dermacolor* products before.

Contents:
10 g = net wt. 0.35 oz

Stock No.
779999

775003

Dermacolor Mini Palette

The mini palette contains small quantities (about finger-nail size) of 16 shades in the Dermacolor range. These are excellent 'sampler' kits that have a good range of colours. Use these sets to determine the right shade for the right season. Available in seven compositions:

#1 - Olive Tones:

D1, D2, D3, D4, D5, D6, D7, D8, D9, D10, D11, D32, D13, D14, D15, D16. The colours range from the pale yellow highlighter to a dark milk chocolate skin tone. Most are olive colours. D32 is a normal lip colour. D13, D14, D15, D16 are dark tones that seem to lack the olive colouring.

#2 - Warm Tones:

D0, D1W, D2W, D3W, D4W, D5W, D8W, D50, D51, D55, D56, D18, D31, D32, D40, D20. The colours range from the light pale yellow highlighter to a light milk chocolate skin tone. All are warm colours. D31 and D32 are lip colours. D40 is a Dark olive grey.

#3 - Yellow & Darker Skin Tones:

D1, D2, D3, D3½, D4, D4½, D5, D6, D7, D8, D9, D10, D11, D18, D19, D20. Similar to palette #1, but with more nuances and no very dark tones.

#4 - Multi Tones:

D0, D1, D1½, D2, D3, D3½, D4, D4½, D5, D6, D7, D9, D50, D51, D55, D32. Mainly light, Caucasian skin tones. Most are olive colours. D32 is a lip colour.

#5 - Mixed Tones:

D61, D62, D63, D64, D65, D66, D17, D67, D070, D071, D089, D102, D512, D546, D305, D742. A mix of eight popular skin tones (ranging from light to dark) and eight bright shades (white, black, grey, dark brown, green, dark blue, yellow and light brown).

DUNKEL - Dark Skin Tones:

Sixteen dark shades including several darker chocolate tones. Suitable for Africa and the Middle East. D11, D13, D14, D15, D16, D17, D20, D742, D56, D040, D043, D10W, D006, D007, D101 and D102.

H16 - Light & Medium Olive Tones:

D1, D1½, D2, D3, D3½, D4, D4½, D5, D6, D7, D8, D9, D10, D11, D32, D13. Similar to palette #3. All are olive tones with a few mid-tones. D32 is a lip colour.

Contents:

14 g = net wt 0.4 oz

Stock No.

771006

Stock No.
701450

Dermacolor Powder Brush

Special blending brush with wooden handle. Soft goat hair. Washable in bio-degradable soap.

Stock No.
701730

Application Instructions

Have ready: A sponge for application, a powder puff, a natural goat hair blending brush and a Dermacolor applicator brush.

Preparation of Skin: Apply *Dermacolor Cleansing Lotion (Toner)* with cotton pads. Use of Cleansing Lotion is a must to insure waterproofing. If required, moisturise the skin with Cream Effective No. 2.

Colour Choice: From the 24 colours available in your *Dermacolor Artist Palette*, choose a shade or shades (remember, all colours are intermixable and mixing may be necessary). Due to the influence of the sun, or the change of seasons, the colour tone of your skin will change from time to time and you will need to choose 2 - 3 different shades, occasionally check which shade is most appropriate.

Application: Apply *Dermacolor Camouflage Creme* thinly and evenly with a sponge or fingers up to 2 cm (less than 1") past the edge of the condition. Fade away the edges with a dry sponge or brush, It may be necessary to dampen the sponge during the application.

Shading: To achieve a natural camouflage effect, proper highlighting and shading, (or the application of rouge) is necessary; D32 are your rouge colours. Apply gently and blend in the choice of Dermacolor Rouge from the cheek bone fading away at the temple. Eyebrows and the male beard and moustache areas can be shaded with D40 or other comparable dark colours in your palette.

Powdering: Once satisfied that the *Dermacolor Camouflage Creme* has been applied correctly, apply *Dermacolor Fixing Powder* with your powder puff so that all the concealed areas are covered. Application of the powder liberally is a must for weatherproofing.

Fixing: Allow the powder to set for approximately 5 - 10 minutes (depending on severity of area covered). After this period, the Camouflage Creme is fixed. Excess Fixing Powder is gently brushed off with the soft natural goat hair blending brush, taking care not to dislodge or damage the prepared areas. Mist the face with mineral water or aloe facial mist to soften the effects of the powder. After this fixing process the treated areas are rub resistant and waterproof.

Uneven Skin: Under special circumstances, should the skin have scars or uneven surfaces, these can be smoothed over with *Dermacolor Skin Plastic*.

Additional Make-Up: If desired, a dry makeup may be applied over the treated areas.

Touching Up: Touch up should not be necessary as the *Dermacolor* preparations are waterproof and should last for the whole day. In special circumstances a touch up or reapplication, including the use of *Fixing Powder*, might be desired.

Removal: Use *Dermacolor Cleansing Cream*, or in the case of very sensitive skin, *Dermacolor Cleansing Milk*. Apply *Dermacolor* cleansing preparation gently onto the made up skin areas, until the camouflage is gently lifted from skin. Remove with a warm damp cloth or damp cotton pads. A second application may be required.

Final Cleansing: For the final cleanse apply Dermacolor Cleansing Lotion (Toner) with cotton pads. For a milder application of the Toner, you may wish to dilute your product with distilled water.

Information: Dermacolor preparations are clinically tested for skin sensitivity and as yet no toxic or allergic reaction has been observed.
